

## Final Report for Graduate and Professional School Relations

This year, we were excited to have 23 universities participate in the Texas Swing, marking a significant increase from 18 in 2022 and 19 in 2023. With 58 institutions contacted, this translates to an approximate participation rate of 40%.

In July, the Executive Committee posed two key questions:

1. How many institutions attend the Swing events?
2. Should we consider charging a fee for non-TACRAO member institutions to access the Swing calendar, similar to the College Day/Night Schedule?

Our committee believes we currently lack sufficient data to address these questions effectively. We are committed to gathering attendance data from the past two years to inform our decision regarding potential fees for non-members.

We plan to reach out to the institutions that participated in previous years to collect the necessary information. Additionally, we plan to consult with the organizers of the College Day/Night Schedule to gain insight into their approach.
